

MEETING WITH CLIENTS

Meeting Minutes

August 11, 2014

Opening:

The first meeting of the SSAD 19 project was fixed through EMail at 4:30 PM on 11/08/2014.

Present:

Neeraj Kumar Elluru, Mani Kanta, Adhish Singla, Nitish Jain, Romil Aggarwal, Shivam Khandelwal

A) Agenda

Get initial requirements and partial discussion over them.

B) Old Business

There was no old business to discuss

C) New Business

- Clients explained to us brief project requirements.
- The complete project is divided into 3 modules for easier referencing in future.
- The tools working (divisions) is explained as follows :
 - TOOL 1 (Web Crawler)
 - Crawl open web data such as Wikipedia, news articles and social media.
 - Extract the text present in each article.
 - Clean the text and parse it into sentences.
 - Shortlist sentences based on criteria such as number of unique words per sentence.
 - Create a final set of sentences and calculate statistics such as number of phonemes, unique words, etc.
 - TOOL 2 (Voice Recorder)
 - Take in an input file with a list of sentences to be recorded.
 - Display one sentence at a time. The user should be able to record the sentence, stop, play and re-record each recording. Once the user is satisfied with the recording, then he should be able to go to the next sentence.
 - The recordings should be verified using signal processing algorithms.
 - The save option should be activated when the speech signal is approved by the algorithm.
 - *Tool needs to be developed for Windows, Mac and Web/Mobile platforms.*
 - TOOL 3 (ITRANS)
 - The tool requires input parameters ITRANS script file, Unicode script file, and Audio files.
 - Renaming and normalizing the audio files.
 - Upload the modified audio files on the server in "tar" format.
 - Generate individual ITRANS and Unicode files for each audio file.
- Clients told that there is no technical constraints and can be developed in any language.

D) Next Meeting Dates and Time

- No such discussion but mutually discussed and agreed to have the meetings as soon as any problem arrives or some module is partially completed for reviews.

E) Adjournment

At 5:10 PM, the meeting was adjourned.
